

**Next Class Expected to Begin in Fall 2010!**

# CNC

## Computer Numeric Control Operator Basics

If you're hoping to update your skills or would like to launch a new career in the machine tooling field, the Computer Numeric Control Operator Basics course beginning at RTEC this fall is your solution. During the program, you will complete introductory coursework in machine math, metallurgy, measurement, blue prints, tolerancing, conventional machining and CNC machining.

This course will be offered through a special partnership with Northeast Community College (NECC) in Norfolk, NE. Upon successful completion of this course, you will receive a Business and Industry Training Certificate from NECC and you'll be able to enter the workforce as a trained machine tool operator.

For your convenience, the program will be held on two evenings per week from 4:30 p.m. to 9 p.m. Class size is limited. Call for more information!

### CNC Courses include:

- **INTRO TO MACHINE OPERATIONS**  
Dates to be announced  
Tuesdays & Thursdays, 4:30 p.m. - 9 p.m.
- **INTRO TO CONVENTIONAL MACHINING**
