

# **Hobby Arts & Craft Welding Coming This Fall**

YANKTON - If you've been waiting for an opportunity to learn a new craft or start a new hobby or simply want to be exposed to a variety of welding techniques, you'll want to sign up for the Hobby Arts & Craft Welding class being offered at RTEC this fall.

During the class, you'll be introduced to the basics of welding while you learn to understand simple diagrams and find out how to use step-by-step instructions for creating attractive welded creations. By the end, you'll learn what it takes to create everything from functional household items to seasonal objects such as snowmen and hearts.

The Hobby Arts & Craft Welding class will be held in the welding technologies lab at the Regional Technical Education Center (RTEC) at 1200 W. 21st St. in Yankton.

The starting date for the class, which was originally scheduled to begin on Oct. 26, has been pushed back. New dates and times for the class are expected to be announced soon.

Cost of the 15-hour Arts & Crafts Welding course and the student textbook is \$195 plus tax. No previous welding experience is needed, making this class ideal for amateurs and hobbyists.

For more information or to register for this hobby course, please contact RTEC at (605) 668-5700.

Payment is requested at the time of registration. For your convenience, RTEC now accepts Visa and MasterCard. Money orders are also welcome.
