

Brand New Curriculum! Begins Feb. 27, 2012!

CNC Machine Operator Program

Features On-The-Job Training and NIMS Certification

If you've been searching for a training that was specifically designed for the CNC Machine Operator, you'll want to explore the brand new CNC program that RTEC will launch this February. This training will prepare students to take the NIMS (National Institute for Metalworking Skills) CNC Machine Operator Certification. The cost of one certification attempt is included in the course fee.

This streamlined program features Amatrol's industry validated learning system and includes 80 hours of classroom learning and an additional 20 hours of On-The-Job Training (OJT). RTEC's new CNC training teaches 132 skills, including these key ones, that CNC Machine Operators need:

- CNC mill, lathe and grinder set-up & operation
- Tool identification, set-up, use and maintenance
- Fixture set-up and operation
- CNC troubleshooting & maintenance for operators
- Precision measurement & gauging
- Geometric dimensioning and tolerancing
- Print reading
- Machining processes
- Statistical process control
- CNC Program Operation
- Quality and cycle time optimization

Call RTEC at 668-5700 and register for this re-designed training today! Class size is limited to 10!

CLASS TIMES & DATES:

The course will begin on Feb. 27, 2012, and end on May 21, 2012. Classes will run from 4-8 p.m. on Monday & Thursday evenings.

PROGRAM COSTS:

Cost of the training is \$2,700.00. Financial assistance may be available to those who qualify. Please inquire for details/referral.
